

4. Base-Board

For perfect appearance of corridors and rooms equipped with any flooring, DLW Flooring also offers an elegant and sturdy aluminium base-board.

The patented base-board is the first of its kind that can be installed from both sides. It can be installed to show the elegant anodized aluminium surface on the front. Turned around, any flooring material or other decorative stripe of up to 3 mm thickness can be inserted into its slot.

To join two or more base-boards, to install at corners and to complete the base-boards ends, all necessary accessories are made of the same material are also available.

For easy installation we recommend to use our adhesive tape, shaped tridimensionally for perfect fit.

External corner	Aluminum anodized	1 piece	29445
Connecting unit	Aluminum anodized	1 piece	29446
Adhesive tape		1 roll = 10 m	29447

5. Scala Skirts

Harmonized design skirts "Made in Germany":

The range of Scala Skirts includes wall connections in harmonized designs of wood and uni matching to our Scala collections. They are made out of high-quality FSC certificated pinewood, coated with PVC-free plastics. This combination makes the Scala Skirts extra robust. Elastic and soft slices on the top and bottom side lead to a perfect wall connection.

The internal and external corners, as well as the installation can be made by using a mitre tool and hotmelt system. This makes the Scala Skirts easy to install.
